Given the growing importance of Environmental Protection, it is committed to meeting the demands of its customers while promoting sustainable development management of its natural resources, reducing environmental impact and continuous environmental control of its activities.

To achieve the above, the Management of **AGRO.VI.M. S.A.** implements actions that have the following main application axes:

- ✓ Implementation of an Environmental Management System according to the international standard **ISO 14001** in order to continuously improve the company's environmental performance.
- ✓ Satisfaction of compliance requirements of the company's activities with the current environmental legislation, with all the relevant legal requirements and standards and with the special rules of operation and safety provided by the current legislation for the established Industrial Areas.
- ✓ Integrate environmental criteria: risk analysis and business decision, investment, supply chain and supplier management, and other processes that may have implications for environment, energy and / or climate change.
- ✓ Full Analysis of the Environmental Impact and take all appropriate measures to minimize them, as well as Environmental prevention measures.
- ✓ More rational use of natural resources, energy, raw materials and auxiliary materials in production processes, with the ultimate goal of minimizing where possible, the production of liquid, solid or waste.
- ✓ Introduction of environmental programs aimed at continuous improvement of environmental performance and elimination of environmental footprint.
- ✓ Continuous information, training and encouragement of all staff for their active participation in improving environmental performance and compliance.
- ✓ Providing information to external bodies on environmental performance in order to inform and cooperate for the wider protection of the environment.
- ✓ Continuous review of the environmental programs and objectives set by the company in order to continuously improve environmental performance.
- ✓ Systematic measurement, evaluation and monitoring in the implementation of the principles of environmental policy.

The Management is committed to the implementation of the Environmental Policy, with all employees in **AGRO.VI.M. S.A.** sharing responsibility.
